DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ruthleen E. Uy on April 14, 2006.

The application has been amended as follows:

Claim 1, line 3, -- non-diffracted -- has been inserted before "light";

Claim 1, line 12, -- ,wherein the photodetector is positioned at the end face of the plastic fiber, without an optical system intervening between the plastic fiber and the semiconductor light receiving devices -- has been inserted after "plastic fiber"; and

Claim 19, line 10, "assymetrical" has been changed to --asymmetrical--.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art cited on the attached PTO-892 is the most relevant prior art known, however, the present invention distinguishes over the prior art of record because none of the references either alone or in combination disclose or render obvious:

- a transmission apparatus as defined in claim 1, comprising a photodetector for detecting non-diffracted light, wherein all of the plurality of the semiconductor light receiving devices receive the light which is radiated out from the plastic fiber, wherein the photodetector is positioned at the end face of the fiber, without an optical system intervening between the plastic fiber and the semiconductor light receiving devices in combination with the other limitations of claim 1; or
- a transmission apparatus as defined in claim 19, wherein each of the light receiving areas of the plurality of semiconductor light receiving devices are asymmetrical in combination with the other limitations of claim 19.

Claims 2-18 and 20 depend from claim 1.

Hence, there is no reason or motivation for one of ordinary skill in the art to use the prior art of record to make the invention of claims 1-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
